Personal History

My main occupation for the last 12 years has been home school mom. I have also enjoyed teaching science to homeschooled children for the past 5 years. I became a Christian when I was 13 years old and have enjoyed studying and teaching science from a Christian perspective. I have a Bachelor of Science degree from Western Michigan University.

Elementary Science

In elementary science for fall of '09, we will be using the text; Exploring Creation with Zoology, Flying Creatures of the Fifth Day. This is available on the Apologia website. In this book, your children will begin exploring the dynamics of flight and animal classification, understanding why the design we see in these incredible creatures points us to our Creator God. Then, get ready for the exciting adventure of learning about birds. Your children will learn how to attract various bird species to your yard and identify them by looking at their special physical characteristics, diverse nests, and interesting domestic practices. They will also learn the anatomy and the glorious design that enables birds to do remarkable things. After becoming amateur ornithologists, your children will explore the world of chiropterology, which is the study of bats.

There is a copy/lab fee of \$8.00 per student.
