Computers 1

I was raised in a Christian home and was led to the Lord at a very early age. Through the varied ups and downs that God took me through, he has proven himself faithful in every way. I graduated from GVSU with a B.S. in Computer Science with an emphasis in Information Systems. I have worked in the computer industry for the past 12 years and enjoy most anything related to technology. I am okay with being called a computer geek but not a computer nerd. I have served in my church in the youth department for 7 years and amongst other things, I also support all things technology there. I have three younger kids and have been married for over 11 years.

I Peter 3:8-17

Computer Basics

What does the Bible say about computers? How does the Bible govern our use of computers? What does the Bible say we should use computers for? We will inductively dig these answers out and many more as the students learn essential life skills from the Bible. With that foundation, the students will learn computing essentials.

Topics Covered

- The computer - Hardware, OS (what's included and what's left out, the other OS's), installing software, navigating in windows/working with files
- Internet - Netiquette, safe computing, proper research, legal downloading, browsers and freeware
- Microsoft Office 2003 - Word, Excel, PowerPoint

Resources needed:

Laptop with Microsoft Windows XP and Microsoft Office 2003 (Word, Excel and PowerPoint specifically).
3-ring Binder, colored pencils (12 pack), USB flash drive, Internet access.
